Prices of above Mixtures f. o. b. Richmond, 100-lb. lots and over, 21c. lb.; 50-lb. lots, 22c. lb.; 10-lb. lots, 24c. lb.

MEADOW MIXTURE No. 10.—Contains a greater number of grasses and clovers, and recommended for sowing on practically all kinds of soils for either hay or pasturage. Prices: lb. 30c.; 10-lb. lots 25c. lb.; 50-lb. lots 23c. lb.; 100-lb. lots 22½c. lb.

WOOD'S LAWN GRASS SEED

WOOD'S EVERGREEN LAWN GRASS

A mixture composed of the finest grasses. Well adapted for use in the central and western sections of North Carolina, all of Virginia and the Northern States. With a little care and attention **Wood's Evergreen Lawn Grass** in these localities will furnish a beautiful green all-year-round lawn. It does not contain any of the coarse grasses, only the best turf grasses being used.

Prices not prepaid: lb. 45c.; 10-lb. lots 40c. lb.; 50-lb. lots 38c. lb.; 100-lb. lots and over 37c. lb.

WOOD'S DIXIE LAWN GRASS

In the eastern section of the Carolinas and the Southern States, where the finer grasses will not stand the hot summer months, our **Wood's Dixie Lawn Grass** is just what is needed to give a year-round beautiful green lawn. This mixture contains grasses that will thrive during the fall, winter and spring months, together with Carpet and Bermuda Grass, which will take possession during the summer. For putting in a new lawn, you will find that this Lawn Grass will give you better results than any other combination of grasses.

Prices not prepaid: lb. 45c.; 10-lb. lots 40c. lb.; 50-lb. lots 38c. lb.; 100-lb. lots and over, 37c. lb.

WINTER LAWN GRASS

In sections where Bermuda Grass predominates and which turns brown during the winter months, the grasses in this mixture will thrive and give a fine green appearance during the dormant period of the Bermuda Grass. When sowing, scarify the Bermuda sod with a sharp rake, then sow the seed at the rate of one pound for 300-square feet, or forty to fifty pounds per acre. **Winter Lawn Grass** is also adaptable for use on sandy soils or where a green lawn is wanted only during the winter months.

Prices not prepaid: lb. 30c.; 10-lb. lots, 25c. lb.; 50-lb. lots 23c. lb.; 100-lb. lots and over, 22c. lb.

WOOD'S PERMANENT LAWN GRASS

A mixture of hardy growing grasses, making an excellent turf for parks or large places which are subjected to harder usage than the ordinary lawn. It will stand dry, hot weather better than the finer lawn grasses, and is especially recommended for use where special care and attention cannot be given.

Prices not prepaid: lb. 40c.; 10-lb. lots 35c. lb.; 50-lb. lots 33c. lb.; 100-lb. lots and over, 32c. lb.

SHADY PARK LAWN GRASS

A special mixture of grasses adapted to growing under trees and in shady places. This mixture can be very satisfactorily used in localities as described for **Wood's Evergreen Lawn Grass**.

Prices not prepaid: lb. 45c.; 10-lb. lots 43c. lb.; 50-lb. lots 41c. lb.; 100-lb. lots and over, 40c. lb.

QUANTITY OF LAWN GRASS TO SOW.—One pound will seed about 300 square feet; 50 to 60 pounds of the finer mixtures per acre.

While we exercise great care to have all seeds pure and reliable, we give no warranty, express or implied, as to description, quality, productiveness, or any other matter connected with the goods we send out, and will not be in any way responsible for the crop. Every order for articles named in this price-list will be executed on these conditions only.
